- **Results:**
 - **5 study trips**
 - **11 workshops**
 - **3 summer schools**

Akcent@net

The main objective of the project is to deepen cross-border ties between educational institutions in the Czech-Polish border region. The project therefore aims to increase the intensity of cooperation between schools and teachers in 6 Euroregions: Nisa, Glacensis, Praděd, Silesia, Těšínské Silesia and Beskydy and to create a cooperation network of primary and secondary school teachers throughout the Czech-Polish border region. The creation of this network follows on from the previous project akcent@com, which aimed to arouse interest in cross-border cooperation between teachers.

This objective is implemented through the following activities:

- Networking meetings for teachers;

- Jobshadowing – exchange internships for teaching

- The main objective of the project is to deepen cross-border ties between educational institutions in the Czech-Polish border region. The project therefore aims to increase the intensity of cooperation between schools and teachers in 6 Euroregions: Nisa, Glacensis, Praděd, Silesia, Těšínské Silesia and Beskydy and to create a cooperation network of primary and secondary school teachers throughout the Czech-Polish border region. The creation of this network follows on from the previous project akcent@com, which aimed to arouse interest in cross-border cooperation between teachers.
- This objective is implemented through the following activities:
 - Networking meetings for teachers;
 - Jobshadowing – exchange internships for teaching staff;
 - Creation of a Cross-Border Competence Center of the Future.

GEOCAMP - supporting geology teaching towards active citizenship

- 1. 8. 2021 - 31. 7. 2023

Five days workshop in Karviná

Individual research teaching:

EU integration of Ukraine across borders with the help of the V4

- The Association of the European Border Regions (AEBR) is the most prestigious and the oldest advocacy organisation of cross-border cooperation (CBC) in Europe. Before the Ukrainian war, the association had several Ukrainian members, Ukrainian-Russian euroregions included. These cooperation initiatives had a special EUisation mission of the Ukrainian and Russian regions, which was abruptly interrupted by the war. At the same time, the war accelerated the negotiations targeting the EU integration of Ukraine. The Eastern European country signed the association agreement with the EU in 2017 and since then, several steps have been made in order to adapt the common European values, to improve the administrative system, to introduce the European policies, but the integration process was very slow and it seemed to be long-lasting. As a consequence of the war, Ukraine was granted the candidate status in June 2022, half a year after the application. However, even after the war, Ukraine will have to make remarkable efforts until the accession. During this process, the lessons and experiences of the Visegrad Four countries, gained during the EU accession process and beyond, might be beneficial and usable for the Ukrainian partners. Cross-border cooperation can have a key role in this process, as has been the case for the Visegrad countries since the establishment of the first Euroregion in the former communist bloc, namely the Euroregion Neisse-Nisa-Nysa in 1991.

- Borders Shaping Perceptions of European Societies (B-SHAPES) - <https://www.sdu.dk/en/forskning/forskningsenheder/samf/b-shapes> - is a Horizon Europe Research and Innovation Action analyzing and assessing how borders still are a key factor of how we understand societies. Nine European universities, one research institute, a national museum, a foundation, a political association, a consultancy, and an art collective have come together for three years. In cooperation with Europeans living in border regions, we will examine the role of borders under three lenses:
 - 1. Euroscepticism in border regions,
 - 2. minorities in border regions, and
 - 3. border landscapes as heritage.
